

inMailX[®] for HPE CM

Enterprise Emails and Content Management

Enhance Emails and Content Management Compliance

As organisations are required to capture and manage emails and documents to meet their corporate, legislative and regulatory requirements, an effective solution is crucial to ensure emails and attachments are filed and managed in accordance with such requirements.

inMailX for HPE Content Manager ('HPE CM') is an enterprise emails and content management solution for Microsoft Outlook and HPE Content Manager, designed to improve information governance and compliance. inMailX for HPE CM solution consists of inMailX Email Manager Module and inMailX HPE CM Connector.

With inMailX for HPE CM, users can file incoming and outgoing emails into HPE CM in an intuitive and simple process, reducing the complexity of managing and sharing email correspondence.

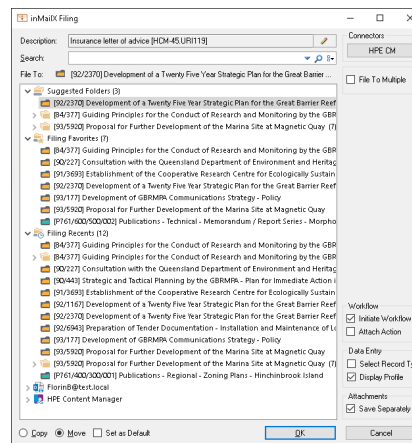

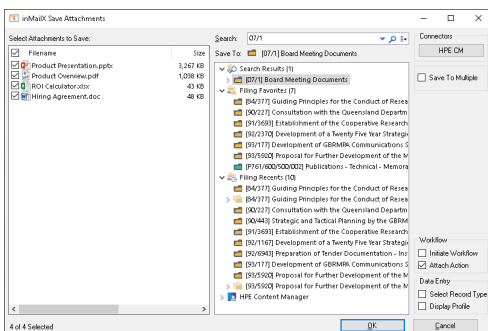

inMailX can be configured to force users to file their emails into HPE CM, mitigating risk and ensuring compliance with corporate policies.

inMailX for HPE CM improves email filing compliance, enhances work practices, and increases HPE CM user adoption.

Empower Users and Improve Productivity

inMailX for HPE CM provides a simple and intuitive Outlook client for HPE Content Manager, enabling users to work with containers, emails, documents, records, actions and workflows from their familiar Outlook interface.

The inMailX client for HPE CM empowers users to easily file and manage their emails and attachments, import desktop files, as well as access and process emails, documents, records, actions and workflows directly from Microsoft Outlook.

When filing emails, users can easily attach actions or initiate workflows from one window.

inMailX Modules

- Email Manager
- Attachment Manager
- Print Manager
- Content Manager
- Time Manager
- Brand Manager

inMailX Connectors

- FileSystem Connector
- HPE CM Connector
- NetDocuments Connector
- SharePoint Connector
- WebDAV Connector
- Worksite Connector
- Worldox Connector

While working in Outlook, users have the ability to easily edit documents and finalise records, update record properties, or initiate and complete actions and workflows.

Description masks can be used to standardise record titles across all users, and 'Soft Delete' ensures that records are not accidentally deleted.

Enhance compliance and productivity with inMailX for HPE Content Manager
